This best-selling text continues to be the only reference to bring together in a single volume the latest clinical techniques and research findings that direct evidence-based clinical practice for lactation consultants and specialists. This text contains a clear clinical focus and over 2,000 research studies support the clinical recommendations in this book.

The *Fourth Edition* has been completely revised and updated to reflect the worldwide expansion of the lactation specialist role. New content on obstetrical issues, especially the importance of skin-to-skin care has been added and important concepts discussed in chapters are summarized at the end of each chapter. Key features throughout include key concepts, internet resources, evidence-based tables and boxes.

Accompanied by a CD-ROM and color insert, both of which accurately depict positioning, the normal breast, and breastfeeding problems!
